[www.fanatec.com](http://www.fanatec.com).

**IMPORTANT:** Avoid dropping objects on or rubbing objects against the magnets to prevent scratches.

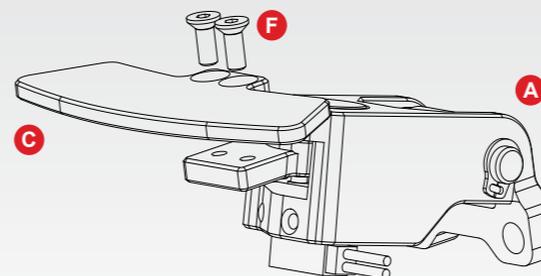

### MODULE ASSEMBLY

**IMPORTANT:** For compatibility information and detailed assembly instructions refer to the manual of the selected steering wheel and download and install the latest PC driver and wheel base firmware. Head over to the Fanatec website [downloads](http://www.fanatec.com) section. [www.fanatec.com](http://www.fanatec.com).

Setup for steering wheels with a diameter larger than 28 cm (GT):

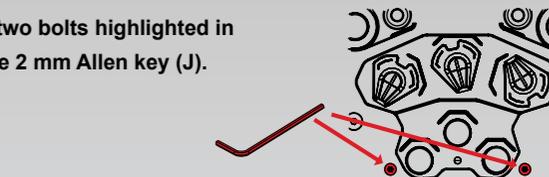

Setup for steering wheels with a diameter smaller than 28 cm (Formula):

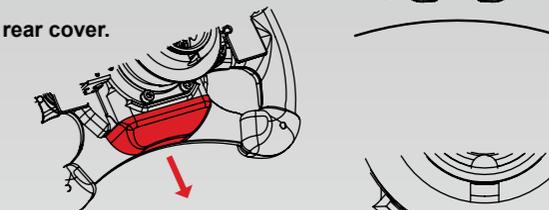

**NOTE:** Both the GT and Formula paddles as well as the ClubSport MPM core units are symmetrical and can be used as left or right shifter paddles respectively.

### ATTACHMENT TO CLUBSPORT STEERING WHEEL FORMULA V2

**1** Loosen the two bolts highlighted in red using the 2 mm Allen key (J).

**2** Remove the rear cover.

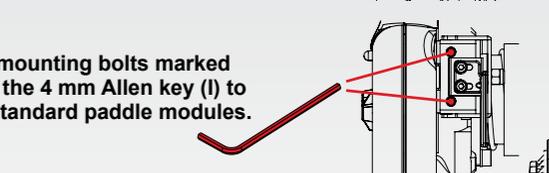

**3** Disconnect the standard shifter paddle cables.

**4** Loosen the shifter paddle bolts marked in red using a 2.5 mm Allen key (not included) for clearance to the mounting bolts of the standard paddle modules.

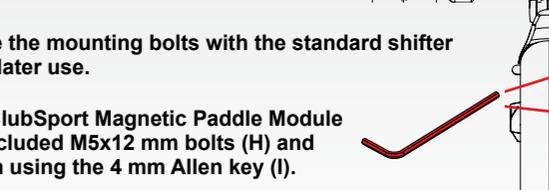

**5** Loosen the mounting bolts marked in red using the 4 mm Allen key (I) to detach the standard paddle modules.

**NOTE:** Store the mounting bolts with the standard shifter paddles for later use.

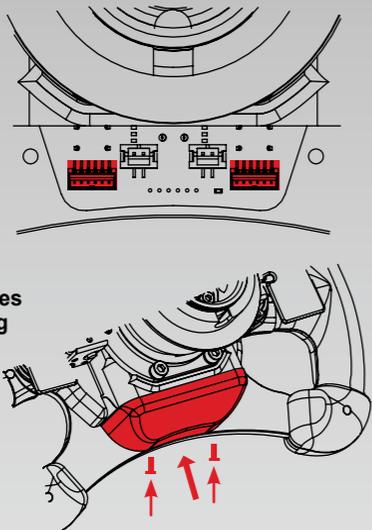

**6** Attach the ClubSport Magnetic Paddle Module using the included M5x12 mm bolts (H) and tighten them using the 4 mm Allen key (I).

- 7** Connect each of the ClubSport Magnetic Paddle Module connectors to the highlighted sockets and arrange the cables neatly.

**! IMPORTANT:** The connector plugs have only one correct orientation. Position the cables carefully inside the housing before reattaching the rear cover to avoid damage.

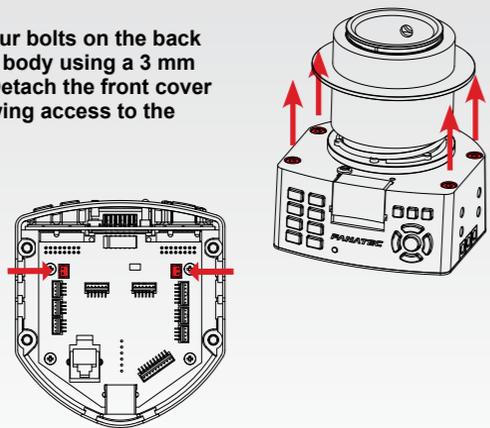

- 8** Reattach the rear cover, insert and tighten the two bolts using a the 2 mm Allen key (J) as in the first step.

### ATTACHMENT TO CLUBSPORT STEERING WHEEL UNIVERSAL HUB FOR XBOX ONE

- 1** Loosen and remove the four bolts on the back of the Universal Hub main body using a 3 mm Allen key (not included). Detach the front cover to open the housing, allowing access to the connectors inside.

- 2** Disconnect the standard shifter paddle cables.

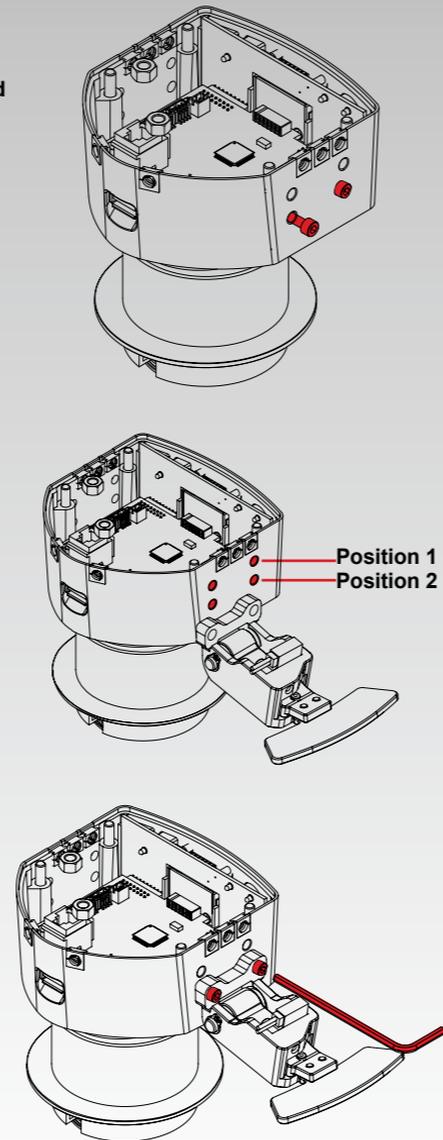

- 3** Loosen the mounting bolts marked in red using the 4 mm Allen key (I) to detach the standard paddle modules.

**NOTE:** Store the mounting bolts with the standard shifter paddles for later use.

**NOTE:** There are two mounting positions on the sides of the Universal Hub depending on the selected steering wheel.

Example: Use "Position 1" for dished steering wheels and "Position 2" for flat steering wheels.

- 4** Attach the ClubSport Magnetic Paddle Module using the included M5x12 mm bolts (H) and tighten them using the 4 mm Allen key (I).

- 5** Connect the ClubSport Magnetic Paddle Module cables to the highlighted sockets.

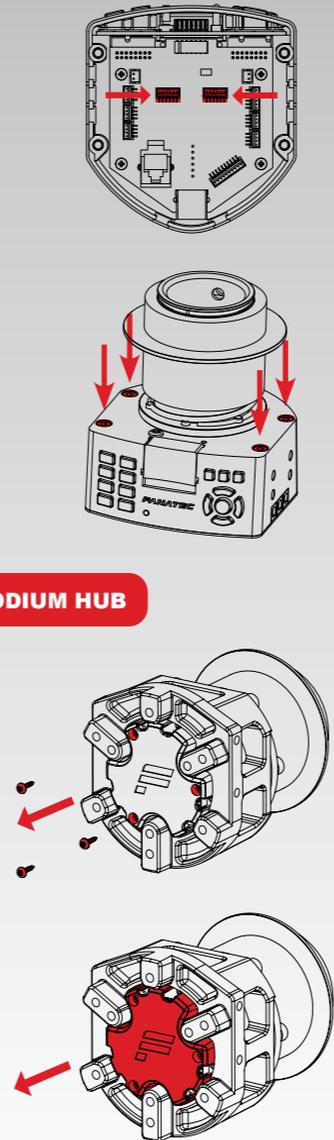

**! IMPORTANT:** The connector plugs have only one correct orientation. Position the cables carefully inside the housing before reattaching the front cover to avoid damage.

- 6** Insert and tighten the four locking bolts using a 3 mm Allen key (not included).

### ATTACHMENT TO PODIUM HUB

- 1** Loosen the three highlighted bolts on the front cover using the 2 mm Allen key (J).

- 2** Remove the front cover.

- 3** Attach the ClubSport Magnetic Paddle Module using the included M5x12 mm bolts (H) and tighten them using the 4 mm Allen key (I).

- 4** Connect the ClubSport Magnetic Paddle Module cables to the highlighted sockets.

**! IMPORTANT:** The connector plugs have only one correct orientation. Position the cables carefully inside the housing before reattaching the front cover to avoid damage.

- 5** Attach the front cover, insert and tighten the three bolts.
